Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 22-27 and 35, drawn to optical fiber, classified in class 385, subclass 15.
 - II. Claims 11-21 and 28-34 drawn to MEMS, classified in class 359, subclass 299.

Each of the invention, I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. During a telephone conversation with Gary Eastman on March of 2003 a provisional election was not made.
